Engineer majoring in Forest Management. Faculty of Forestry, Department of Forest Taxation and Forest Inventory.

PERSONAL QUALITIES

Creativity

On all projects, I always offered ideas and solutions for tasks with incomplete or inaccurate requirements.

Initiative

I make improvements to the processes. Often I take on tasks that are beyond my responsibility.

Responsibility

I will carefully double-check my tasks myself, trying to capture as many cases of using the new functionality as possible. I make sure that my changes do not break the existing logic.
