

Vladislav Munimaev

Senior Full-stack Web Developer

I am a full-stack developer, and I see the meaning of my work as making the life of users easier and helping them in solving their problems. The interface should be convenient, understandable, predictable, work quickly and, ideally, bring joy.

Experience

Lead frontend developer

Arloid

2021 - 2022 / arloid.com / Dubai, UAE

Engaged in support and creation of 5 internal products. On this project, I managed to do the following:

- In a short time, I learned React and Redux from scratch.
- Single-handedly maintained four React and one Vue projects.
- Refactored dozens of legacy code files.

Lead frontend developer on General Electric project

Internal project for General Electric company in the company UpTeam

2020 - 2021 / upteam.com / Saint-Petersburg, Russia

He was engaged in the creation of an internal admin panel for managing, configuring, and launching General Electric services. My achievements in this project:

- The first project as lead developer.
- In a short time, I learned Vue from scratch.
- Successfully and on time completed and handed over the project.

Middle/Senior full-stack developer of the CaaStle project

Project in UpTeam for CaaStle in America

2017 - 2020 / upteam.com / caastle.com / Saint-Petersburg, Russia

He was engaged in the creation of an internal admin panel for managing, configuring, and launching General Electric services. My achievements in this project:

- Creating a flexible constructor that allows us to launch readymade stores.
- Launch of more than a dozen sites for CaaStle partners, such as Banana Republic, Ann Taylor, Express and others.
- Rewriting the frontend part from Backbone to React.
- Complete transition of the backend part from Mohito to Express.

Middle full-stack developer of the Axon project

Project in UpTeam for Neurotech in Israel

2016 - 2017 / upteam.com / neurotech-solutions.com / Saint-Petersburg, Russia

He was engaged in the development of online applications for HR companies, clinics and schools, which allows to detect attention deficit hyperactivity disorder (ADHD). Application features:

- Certified app for detecting ADHD.
- Interface for working with job seekers.
- Interface for working with students and kids.
- Providing an application for the personal use of doctors in clinics.

Middle/Senior web developer

Bank Sovetsky

2013 - 2016 / Saint-Petersburg, Russia

Developed and supported internal web applications:

- Interface for applying for a loan.
- Interface for IP-telephony.
- Web applications for working with the Credit Exchange API.
- Corporate portal.
- Gateways for accepting payments.
- Setting up web servers.
- Interface for information boards hanging in bank branches.

Saint-Petersburg State Forest Technical University named after S. M. Kirov

2006 - 2011

Engineer majoring in Forest Management. Faculty of Forestry, Department of Forest Taxation and Forest Inventory.

Personal qualities

Creativity

On all projects, he always offered ideas and solutions for tasks with incomplete or inaccurate requirements.

Initiative

I make improvements to the processes. Often I take on tasks that are beyond my responsibility.

Responsibility

I will carefully double-check my tasks myself, trying to capture as many cases of using the new functionality as possible. I make sure that my changes do not break the existing logic.
